

AFib in America: STATE IMPACT REPORTS

Medicare is the primary payer for healthcare services used due to AFib.¹ Using information collected by Medicare to pay for healthcare services provided to Medicare beneficiaries, it is possible to examine use and spending for a broad range of healthcare services due to AFib. Although limited to the Medicare population, these data allow for consistent measurement and comparisons across states, as Medicare is a nationwide program. The following statistics and charts highlight the demographics of beneficiaries using services due to AFib, their levels of use of various services and Medicare's payments to providers for this care.

RESULTS AT-A-GLANCE

State	Number of Medicare beneficiaries who have used healthcare services due to AFib	Percent of Medicare beneficiaries who have used healthcare services due to AFib	Total Medicare payments for physician encounters due to AFib	Total Medicare payments for ED visits due to AFib	Percent of ED visits resulting in a hospital inpatient admission	Total Medicare payments for hospital outpatient visits due to AFib	Total Medicare payments for hospital inpatient stays due to AFib	Average length of hospital inpatient stays due to AFib (in days)
Alabama	50,542	6.1%	\$12,175,991	\$223,923	68.8%	\$3,162,971	\$19,392,345	3.8
Alaska	3,668	6.1%	\$854,502	\$68,720	39.5%	\$766,123	\$3,119,631	3.2
Arizona	41,127	4.7%	\$14,809,891	\$267,224	62.8%	\$2,767,434	\$17,240,906	3.2
Arkansas	31,566	6.0%	\$7,905,889	\$203,282	57.2%	\$2,295,238	\$13,577,776	3.7
California	208,944	4.5%	\$69,183,220	\$1,281,119	60.5%	\$18,941,503	\$79,857,068	3.6
